Attorney Docket No. 114293-1623

Customer No. 21269

ABSTRACT OF THE DISCLOSURE

In a computerized analyzer linked to an onboard computer for complex

machinery, a computer-readable binary pattern storage apparatus which has a

plurality of binary patterns constituting an application program executable by

5 the computerized analyzer. Sets of instructions in the application program are

executable, in response to user input from a graphical user interface, to provide

a variety of functions which include: monitoring and processing data received

to provide groups of vertical and horizontal graphical coordinates suitable for

graphing; displaying graphs on a visual display device from the graphical

10 coordinates; rearranging and highlighting selected graph designations;

providing a second horizontal scale to a selected portion of the horizontal

graphical coordinates to give a selected graph a zoomed-in appearance;

recording and displaying graphical time frames of the groups of graphical

coordinates; and permitting the real-time and diagnostic-code-triggered

15 collection, processing, and graphical display of data.
